

REMARKS/ARGUMENTS

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Drawn to a display controller comprising a plurality of mirror ratio setting units, wherein each of the plurality of mirror ratio setting units corresponds to an identical adjustment magnitude when adjusting the mirror ratio.

Species II: Drawn to a display controller comprising a plurality of mirror ratio setting units, wherein the plurality of mirror ratio setting units correspond to a plurality of different adjustment magnitudes when adjusting the mirror ratio.

Applicant is required under 35 U.S.C 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-5 and 8-16 appear to be generic.

Response:

The applicant has consequently amended the claims in the above Amendments to the Claims section to elect the claims in Species II. Claims 1-5 and 7-16 are elected as the subject matter to be examined in the present application. Claim 6 is non-elected and therefore withdrawn.
